SFERA

Forme geometriche perfette danzano in un gioco di altezze e materia generando un design unico e personalizzabile. Una collezione definita da più elementi che compongono delle sospensioni ben strutturate, da collocare a diverse sommità, in cui ogni punto luce si caratterizza per un elemento in materiale cementizio e un diffusore sottostante in vetro borosilicato, soffiato, bianco opaco. Evoluzione continua / Perfect geometric shapes intermingle in a play of varying heights and materials, creating a unique and customisable design. Sfera is a collection defined by several elements that compose well-structured pendant lamps, to be positioned at different heights. Each light point is characterised by an element in cementitious material and an underlying diffuser in opaque white borosilicate blown glass. Continuous evolution
